About This Game

"Prison Architect, BUT IN SPACE!"

— **MANY A TRUE NERD**

Space Station Continuum is a building & management sim inspired by the past, present, and future of humans in space.

Based on real space history, Space Station Continuum puts you in charge of an internationally funded space station in low Earth orbit.

You'll manage power generation, heat dissipation, water re-circulation, and more. All while your astronauts conduct scientific experiments to earn money and research new technologies. Over time, these new technologies will help you expand your station and increase its efficiency.

Reaching certain milestones will allow you to progress into new eras of spaceflight, unlocking new research opportunities, equipment designs, launch vehicles, music, and more.

Technologies like asteroid mining and orbital hydroponics will help reduce your reliance on expensive resupply shipments from Earth. One day it could be the Earth relying on you!

Title: Space Station Continuum
